Full job description

Your new company

Our client is a young, forward thinking, creative, project management and development consultancy. A confident, outgoing, social team, that not only enjoy what they deliver but enjoy working and socialising as a team.

Overseeing projects from start to finish for a range of clients, the feedback from young PM's I have placed here is second to none.

Your new role

Coming from a construction, builder background, you will oversee projects, predominately on the delivery end for a range of clients. Private schools, boutique residential developments, commercial towers, you will act as the clients Project Manager in seeing these fabulous developments through construction.

The initial requirement is someone with experience on schools.

What you'll need to succeed

With a construction related degree, you will have between 3-7 years experience as either a project engineer, contract administrator, project architect or project coordinator working at either a Tier 1 or Tier 2 builder/Architect firm here in Melbourne. You will be comfortable managing this level of builder, building relationships and getting the best outcomes for the client. You will have strong contract admin skills, coordination skills and excellent communication skills and rapport building. You must have been in projects \$30m+, schools.

What you'll get in return

A life! Less hours than the average builder, no weekend work, and a close knit

team second to none. 3 fantastic relaxed, down to earth Directors, who go out of their way to create and maintain a fun culture. Social drinks and activities, urged to interact and help maintain that enjoyable culture.

Having placed 3 people in the last year I really know the differences from builder to these guys.

What you need to do now
