Full job description

Your new company

An exciting new opportunity is available for a Senior DevOps Engineer on a Permanent basis.

Your new role

We are looking for an experienced and capable Senior DevOps Engineer to join our team. This position is a permanent full-time role based in Canberra, Australia and offers a rare opportunity to work in a fast growing, best of breed company that retains the atmosphere and culture of a start-up. If you're passionate about doing great work in a fantastic, flexible environment then this could be for you.

Responsibilities

- Maintain and improve our SAAS infrastructure (multiple cloud-based data centres)
- Ensure excellent security, resilience, and uptime.
- Be a part of an on-call 24/7 level 3 priority 1 support roster
- Support increased automation of system rollout to our data centres.
- Work with partners and customers to solve specific high-level issues.
- Collaborate with our software architecture teams to support change in our services.
- Design and actively improve release and deployment pipelines for products in the region

Career level

EXPERIENCED NON-MANAGER

Work Authorisation

AUSTRALIAN CITIZEN / PERMANENT RESIDENT

- Support the automated deployment of infrastructure into cloud platforms.
- Be an authority in the use of tooling for delivery and operations usage

What you'll need to succeed

- Experience in the management of cloud-based systems, preferably with a cloud certification
- Experience with Kubernetes and Docker, a CKA or CKAD certification would be advantageous.
- Experience with IaC tools i.e., terraform/ansible
- Experience in configuring modern deployment pipelines i.e., Azure DevOps
- Excellent troubleshooting skills
- Previous experience with monitoring tools e.g., Prometheus/Grafana/Splunk
- Fluent in English and have excellent verbal and written communication skills
- System administration experience (including Linux experience)
- Open to new ideas and experiences. Seeks out learning opportunities. Handles situations and problems with innovation and creativity. Thinks broadly and strategically
- Shows evidence of clear analytical thinking. Gets to the heart of complex problems and issues. Applies own expertise effectively. Quickly learns new technology. Communicates well in writing
- Plans and works in a systematic and organised way. Follows directions and procedures.
- Supports others and shows respect for them in social situations. Puts people first, working effectively with individuals and teams.

What you'll get in return

- Working simultaneously across a diverse range of interesting projects in a high performing and collaborative work environment.
- Security clearance is not needed.
